YOUR EASY ORDERING GUIDE

1. Select Your Material

Standard Material Types

Microweave (ribbed polyester): It's a super tight, super resistant lanyard that makes it ideal for potentially wet conditions.

Optiweave: Made of polyester, this lanyard is great for silk screen imprinting.

Flatbraid tubular: This is a well-designed lanyard weave that helps prevent the lanyard from spinning around.

Anti-Microbial: Polyester material which contains nano particles that prevent the growth of germs. Perfect for health care and food service

(Soon to be owned)

Woven-in Polyester: A polyester material in which the design is woven into the fabric.

Bamboo: Comprised of rayon fiber that are made from bamboo. Very soft to touch.

Recycled PET: Made from 100% post-consumer waste.

2. Select Your Imprint Method

Standard Imprinting Methods

Silkscreen Lanyard

Heat Transfer Lanyard

Woven Lanyard

Silk screen Lanyard: are produced using a silk screen printing process and are highly durable and customizable. They are typically made from polyester, nylon, or satin material and can be printed with any design, logo, or message.

Heat Transfer Lanyard: are produced using a printing process that allows full-color designs to be printed onto the lanyard material, resulting in highly durable and long-lasting designs. These lanyards are made from strong, comfortable polyester material and can be customized with any design, logo, or message.

Woven Lanyard: are produced using a Jacquard weaving process that allows highly intricate and detailed designs to be woven directly into the lanyard material. These lanyards are highly customizable and made from strong, comfortable polyester, nylon, or satin material.

3. Select Your Lanyard Width

Width Option
